PROFESSIONAL SUMMARY

Innovative Web Developer with 4+ years of experience building scalable ReactJS, NextJS, and Java applications for ICON plc and Nokia. Skilled in Agile methodologies, CI/CD pipelines, and Jest-based testing — delivered a 20% performance improvement and resolved 300+ critical bugs across enterprise-grade platforms.

TECHNICAL SKILLS

Programing Languages	HTML, CSS, JavaScript/TypeScript, Java
Libraries & Frameworks	ReactJs, NextJs, Bootraps, TailwindCSS, Redux, Zustand, Java Spring boot, Hibernate, Spring Framework,
Databases	MySQL, MongoDB, PostgreSQL, Redis
Cloud & DevOps	AWS (EC2, S3, Lambda), Docker, Kubernetes, Jenkins
Tools	Git/GitLab, Jira/Confluence, Figma, Chrome DevTools, Claude
Soft Skills	Agile Collaboration, Problem Solving

PROFESSIONAL EXPERIENCE

sZTP application (Nokia)

Software Engineer

certificate & OV management platform.

TMA Solutions

08/2025 – Present

- Translated high-fidelity **Figma designs** into reusable **React components**, ensuring a consistent and responsive UI/UX across news monitoring and analysis modules.
- Spearheaded the definition of **OpenAPI specifications** and **database schema designs** with cross-functional teams, establishing a single source of truth for the platform's service contracts.
- Partnered with product owners and backend/frontend teams to **refine API contracts** and align technical requirements, streamlining integration and accelerating delivery.
- Championed **UX improvements** grounded in user-behavior insights and implementation constraints, measurably raising overall product usability.
- Engineered and maintained **backend APIs** to OpenAPI standards while shipping **UI components** faithful to design specs — owning features end-to-end as a full-stack contributor.

Technologies: NextJs, ReactQuery, Recharts (Graphs), Tailwind CSS, Figma, AWS.

Access Management (Nokia)

Software Engineer

Multi-domain SDN/NFV automation platform for telecom providers.

TMA Solutions

02/2023 – 08/2025

- Spearheaded migration from **AngularJS to ReactJS**, modularizing 30+ components and maintaining 100% feature parity to minimise disruption.
- Developed 8 core features and resolved **90+ bugs** and 15 enhancement tickets through iterative sprints, boosting platform stability by 25%.
- Architected complex UI components (**trees, forms, tables, filters, search, CRUD**) with optimised rendering logic, improving render performance by 30%.
- Established automated **CI/CD pipelines** and GitLab best practices, managing 5 seamless releases and cutting deployment time by 50%.
- Integrated **WebSocket** to enable real-time updates for news feeds and alerts, ensuring users receive critical information instantly without page reloads.

Technologies: ReactJS, Java/Spring Boot, Elasticsearch, Maven, Docker, Kubernetes, MySQL, Jira, Jenkins.

Healthcare System (ICON plc)

Software Engineer

Clinical-trial data reporting platform for 200+ pharmaceutical researchers.

TMA Solutions

06/2022 – 02/2023

- Conducted **code reviews** and **pair programming**, mentored intern developers, and led tech-sharing sessions to raise team knowledge and collaboration.
- Accelerated **page-load times by 20%** by eliminating redundant hover handlers in a third-party UI library.
- Architected **responsive interfaces** — tables, forms, and reports — delivering seamless experiences across desktop and mobile.
- Customised **React Query** with advanced **TypeScript** to reduce API boilerplate, improving maintainability and developer efficiency.

Technologies: ReactJS, Java/Spring Boot, Elasticsearch, AWS, DynamoDB, Bitbucket, Jenkins.

Restaurant Management System (RMS)

Software Engineer

Restaurant management web & mobile app streamlining inventory, orders, reservations, and billing.

TMA Solutions

04/2022 – 06/2023

- Engineered **NextJS** front-end with **server-side rendering** and optimised API calls, improving page load performance by 25%.
- Designed user-centred wireframes and prototypes in **Figma**, boosting staff task completion rates by 30%.
- Mentored intern developers through weekly code reviews and best-practice workshops, raising overall code quality and reducing bugs by 20%.
- Collaborated on DynamoDB schema and Spring JPA integration for **inventory/reservations modules**, cutting data-fetch latency by 20%.
- Conducted business analysis and manual QA for stock-reporting features — gathered user feedback, defined KPIs, and validated **50+ test cases** for release readiness.

Technologies: NextJS, Figma, Java/Spring Boot, Spring JPA, Spring Security, GitLab, MySQL, AWS.

Online Bookstore System

Intern Frontend

Online bookstore system

24H Dev

12/2021 – 04/2022

- Developed and maintained **responsive user interfaces** with **ReactJS**, translating Figma designs into reusable components that accelerate feature delivery.
- Collaborated with senior developers and the **UX/UI team** to implement enhancements and resolve UI bugs, ensuring **cross-browser compatibility** and a seamless user experience.
- Participated in **Agile/Scrum** ceremonies — daily stand-ups, sprint planning, and code reviews — gaining hands-on experience with **Git workflow** and team development practices.

Technologies: ReactJS, Figma, NodeJS, MySQL.

EDUCATION

UVNU-HCM University of Information Technology (UIT)

Bachelor of Science in Information Technology

Ho Chi Minh City

2018 – 2022
