4+ years of experience in web development with Java Spring and React, focusing on optimizing backend processes, enhancing UI/UX, and collaborating with cross-functional teams in product development. Experienced in working on various application models.

SKILLS

Programing Languages: HTML, CSS, Javascript, Typescript, Java

Libraries & Frameworks: ReactJs, NextJs, Bootraps, TailwindCSS, Redux, Zustand, Nodejs, Java Spring boot, Hibernate, Spring Framework,

Databases: MySql, MongoDB, PostgreSQL

Project Management: Agile, Scrum, Jira, Github, Confluence

Tools: Visual Studio Code, Docker, Kubernetes

WORK EXPERIENCE

Fullstack Developer

Jun 2025 - Present

TMA

Ho Chi Minh City, Viet Nam

Managed devices and ownership vouchers.

Domains: Telecommunications (Team size: 4)

- Collaborated with cross-functional teams to discuss and define OpenAPI specifications and database schema designs.
- Worked closely with product owners and backend/frontend teams to refine API contracts and align on technical requirements.
- Proposed UX improvements based on user behavior insights and implementation constraints to enhance overall product usability.
- Implemented and maintained backend APIs following OpenAPI standards, and built UI components aligned with design specifications.

Technical Stack: NextJs, TypeScript, TailwindCSS, Antd, Java Spring boot, MySql

Fullstack Developer

Apr 2023 - Jun 2025

TMA

Ho Chi Minh City, Viet Nam

Collaborated with clients across China, India, and Europe to deliver reliable web solutions.

Domains: Telecommunications, Base Layer Networks. (Team size: 8)

- Conducted code reviews, pair programming, mentored intern developers, and led tech sharing sessions to boost team knowledge and collaboration.
- Enabled real-time backend communication for communicates and alerts via WebSocket.
- Developed tasks such as cron jobs, XLSX, csv and PDF report generation.
- Developed a User Activity log visualization in AGGrid using Elasticsearch
- Developed reusable core UI components in a monorepo, configured with TailwindCSS and a Figma-based design system. Ensured consistent design across multiple web apps and significantly reduced development time.
- Refactored and migrated legacy code from AngularJs to ReactJs using TypeScript in Microfrontend architecture.

Technical Stack: ReactJs, Java Spring boot, Hibernate, MySql, Elasticsearch

FrontEnd Developer

Apr 2022 - Apr 2023

TMA

Ho Chi Minh City, Viet Nam

Collaborated with Europe clients to deliver high-quality webapp solutions. (Team size: 7)

Domains: Service Industry.

- Mapped Figma design systems to ReactJs with Styled-component, ensuring consistent design and improved search visibility through QA checks.
- Modified React Router to dynamically generate breadcrumbs, set page titles, and implement authentication guards for secure routing.
- Customized React Query with advanced TypeScript to reduce boilerplate when working with APIs, enhancing code maintainability and developer efficiency.
- Worked closely with design and testing teams to ensure seamless functionality and an optimal user experience.
- Gained backend experience by contributing to small backend tasks, supporting the backend development alongside the team.

Technical Stack: ReactJs, Java Spring boot, MariaDB

Internship FrontEnd

Dec 2021 - Apr 2022

24HDEV

Da Nang, Vietnam

- Resolved critical production issues, resulting in a 20% reduction in downtime and increased application stability.
- Collaborated with the UX/UI team to optimize the user interface, leading to a 20% reduction in bounce rate and an overall improvement in user satisfaction.

EDUCATION

Bachelor of Science in Information Technology

Aug 2018 - Sep 2022

VNU-HCM University of Information Technology (UIT)

PROJECTS

E-comerece App

Aug 2021 - Jan 2022

- Developed a full stack web app e-commerce store, and integrated VNPay with ExpressJs to accept payments.
- Implemented JWT to secure routes, enhance authentication, and improve user authorization
